

YAGNIK PANKHANIYA

Devbhoomi Dwarka, Gujarat, India | +91 91067 25175 | yagnikpankhaniya71@gmail.com

Portfolio: <https://yagnikportfolio1.netlify.app/>

SUMMARY OF QUALIFICATIONS:

Full-Stack Developer with hands-on experience building production-level web applications using Next.js, Node.js, MongoDB, and Python. Developed and deployed a live Recruitment Management System with authentication, file handling, admin dashboards, bulk email automation, and Excel exports. Strong focus on backend logic, database design, Next.js API routes, and authentication using NextAuth.js. Experience with Python-based data processing and GIS analysis applications.

INTERNSHIP EXPERIENCE:

Python Data & GIS Intern | ps Collective, Ahmedabad — Jul 2025 – Sep 2025

- Contributed to development of a Python-based decision support system for data analysis.
- Translated business requirements into technical architecture and system design.
- Evaluated and integrated Python geospatial libraries for data processing.
- Built data ingestion pipelines for structured datasets.
- Implemented geospatial analysis logic and documented technical workflows.

PROJECT EXPERIENCE:

Recruitment Management System (Full-Stack & AI Integration)

Live Project: <https://popoal.com> | **2026 – Present Tech Stack:** Next.js (App Router), Node.js, MongoDB, Gemini 2.0, Stripe/Razorpay, Tailwind CSS.

- **Multi-Tenant Ecosystem:** Engineered a complex platform serving three distinct user roles—**Recruiters, Candidates, and Service Providers**—with secure Role-Based Access Control (RBAC).
- **AI-Powered Candidate Suite (Career Accelerator):**
 - **Profile Intelligence:** Developed **Resume Tailoring, Cover Letter Generation, and Resume Optimization** tools using LLMs to bypass **ATS (Applicant Tracking Systems)**.
 - **Career Growth:** Implemented **Skill Gap Analysis** and **Career Path Simulations** to provide users with personalized **Learning Paths** and **AI Tutoring**.
 - **Smart Matching:** Built a **Smart Job Recommendation** engine and an **Auto-Apply Agent** to automate and optimize the job-seeking process.
- **Advanced Interview & Assessment Engine:**
 - **Interview Coaching:** Built an AI-driven **Mock Interview** system featuring

real-time **Speech & Tone Analysis** and **Behavioral Coaching** for candidate preparation.

- **Market Insights:** Integrated **Industry Trend Analytics** and **Networking suggestions** to keep users competitive in the job market.
- **Recruiter & Service Provider Infrastructure:**
 - **Monetization & Payments:** Integrated a secure **Payment Gateway (Stripe/Razorpay)** to handle subscriptions and service fees for premium recruitment features.
 - **Workflow Automation:** Designed **Bulk Email Automation** via Nodemailer and custom **XLSX Export** modules for high-volume data management.
- **System Performance & Security:**
 - Architected optimized MongoDB aggregation pipelines and implemented secure server-side API routes for encrypted file handling (Resumes/Portfolios).

Shiven Unified Service Platform (Multi-Platform Ecosystem)

On Going Project: astrology-seven-opal.vercel.app | **2025 – Present Tech Stack:** Next.js 14, FastAPI (Python), MongoDB (Beanie ODM), Redis, Tailwind CSS, TypeScript.

- **Multi-Tenant Architecture:** Engineered a unified ecosystem to connect diverse service verticals (Astrology, Vastu, Handyman) under a single high-performance backend and administrative umbrella.
- **Dynamic Metadata Engine:** Architected a robust configuration system allowing administrators to manage platform-wide constants (skills, languages, categories) dynamically via API, eliminating the need for code redeployment.
- **Advanced Governance & KYC:** Implemented a security-first verification workflow that enforces strict profile vetting and compliance checks before service activation, ensuring platform trust.
- **Geospatial Service Discovery:** Integrated **MongoDB 2dsphere indexing** to enable efficient radius-based searching for location-specific services, optimizing the user-to-provider matching logic.
- **Complex Data Rendering:** Designed custom frontend logic to transform dynamic JSON payloads into intuitive, human-readable interfaces for specialized service requirements.
- **Full-Stack Optimization:** Leveraged **FastAPI** for high-concurrency backend processing and **Redis** for session management and caching, significantly reducing latency.

GIS-Based Urban Planning & Analysis Web Application — Academic

Tech: Python, Flask, Pandas, GeoPandas, Shapely, SQLite

- Developed a GIS web app for land use, population, water demand, and road network analysis.
- Processed and visualized spatial data using shapefiles and Excel inputs.

Hotel Management System — May 2024

https://github.com/Yagnik777/Hotel_management-.git

Tech: PHP, MySQL

- Built hotel operations system with CRUD workflows and room booking management.

Foodies – Food Ordering App — April 2025

<https://github.com/Yagnik777/Foodies.git>

Tech: Android, PHP APIs, MySQL

- Built a food ordering application with user registration, menu browsing, and order placement.

TECHNICAL SKILLS:

- **Programming Languages:** PHP, Python, JavaScript (ES6+), TypeScript, Flutter, React native, Android
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, JavaScript, Shadcn/UI, Lucide Icons
- **Backend:** Node.js, Flask, FastAPI, Next.js API Routes, NextAuth.js, RESTful APIs
- **Data & Databases:** MongoDB, Redis, MySQL, SQLite, GeoPandas, Mongoose, Beanie ODM
- **AI & Automation:** Gemini AI API Integration, OpenRouter, Prompt Engineering, LLM Workflows
- **Data & GIS Tools:** Pandas, GeoPandas, Shapely, 2dsphere Indexing (Geospatial Analysis)
- **Tools & Deployment:** Git, GitHub, Vercel, Postman, Stripe/Razorpay Integration (Payments)
- **Operating Systems:** Windows, Linux

EDUCATION:

Bachelor of Computer Applications (BCA), Saurashtra University — May 2025

CZMG BCA – MSc (IT & CA) College | 73.33%

DECLARATION:

I hereby declare that the information above is accurate to the best of my knowledge.
